Dato: 27. september 2016

Letter of rekommandation for Emmanuel Mbecho Techago.

Emmanuel have been working as a data manager and biostatistician with me in the period from october 1. 2015 to september 31. 2016 as a data manager and biostatistician. During this period Emmanuel has worked on three projects to my full satisfaction. He has created data for a projects where he managed and merged data from The National Patient Register(LPR in Danish) with data form Statistics Denmark on social information. This was a very complex assignment involving multiple disease courses for the same patient, that Emmanuel completed in SAS while learning SAS at the same time. Regarding statistics, Emmanuel has completed analysis and illustrations on repeated measures using mixed linear models in the statistical software R to the point of publication. The work is expected to be submitted to a medical scientific journal soon.

Along with working on projects, Emmanuel has been consulting for researchers in Hvidovre Hospital on statistics, in all cases helping to solve the challenges at hand.

There is no doubt in my mind, that Emmanuel will be able to fill a position as a biostatistician with proper supervision, and mature fast during experience.

Emmanuel has a nice and accommodating personality that fits easy into most workplaces. He is hard working with a serious mindset. Only lack of funding has ended his position with us.

You are welcome to contact me for further information.

With kind regards

Steen Ladelund

Head statistician.
